RESTRICTION ORIFICE PLATES

A Restriction Orifice Plate is a device used to restrict flow. It reduces flow and pressure from the upstream side to the downstream side. This is beneficial in order to reduce noise and protect downstream equipment.

Flow Measuring Orifice Plates are also available. Please contact Titan directly for more information regarding Flow Measuring Orifice Plates.

**Model** | **Material**
--- | ---
RP 21 CS | Carbon Steel
RP 21 SS | Stainless Steel

**Materials**
Standard materials for orifice plates are stainless steel and carbon steel. Contact factory for additional materials such as ceramic, fiberglass reinforced plastic, duplex stainless steel, etc.

**Bore Diameter**
Sizing of the restriction orifice is specified by the customer in order to meet specific application requirements. For reference, see below for common design options.

**Codes & Standards**
Currently, there are no corresponding codes or standards that address Restriction Orifice Plates.

**Handles**
Orifice plates can be ordered with or without a handle. Handles are generally 1” wide by 3 3/4” long.

**Additional Design Options**
Restriction Orifice plates can have a variety of specifications. Bores can be placed concentrically or eccentrically with the pipe and can have a full or segmented opening.
