**Replacement Screens and Baskets**

Titan Flow Control, Inc.

**Your Pipeline To The Future!**

**Cylindrical Screen, Style 'A'**

**Slanted Type Basket, Style 'B'**

**Basket Type, Style 'C'**

**Replacements for Any Major Competitor’s Model Strainer**

Titan FCI can manufacture replacements, for not only Titan strainers, but for other companies’ strainers as well!

In many cases, all Titan needs is the model number, size, and perforation. We can also provide a blank specification sheet, **Titan Straining Element Design Specification**, to help identify the exact design and dimensional data required. These sheets are conveniently available online at www.titanfci.com or by calling (910) 735-0000. Titan makes it easy to order the straining element you need!

**Made in Lumberton, NC**

Titan Flow Control, Inc. proudly manufactures its baskets and screens at its own facility in Lumberton, NC.

From cutting the perforation to welding on a handle, Titan’s highly experienced staff creates each screen and basket with care and precision. Once completed, all screens and baskets are then inspected based on their design requirements before being shipped to the customer.

Because Titan manufactures replacement baskets and screens in-house, Titan is able to provide them to its customers at a low cost AND at the highest quality. Additionally, Titan’s in-house manufacturing ensures that a variety of options are available upon demand, including a wide selection of specialty perforations and meshes, Dutchweave meshes, magnetic screen assemblies, drilled or wedgewire screens, pleated straining elements, and much more.

For more information on screen and basket selection, see **Titan’s Screen and Basket Selection Guide** available at www.titanfci.com or in the Technical Data Section of the catalog.

REPLACEMENT SCREENS AND BASKETS
Titan Flow Control, Inc

Extensive Inventory of Pre-Made Screens and Baskets
Titan FCI keeps thousands of manufactured screens and baskets in stock! By maintaining an inventory of the most common screen and basket sizes in standard perforations, Titan is able to meet the high demand for replacements as they are needed. Not only does this allow Titan to ship the standard screens and baskets right away, it also allows Titan’s screen department to concentrate on unique or large orders and to prepare them quickly as well.

Wide Variety of Perforations and Meshes in Stock
Titan stocks many standard and non-standard perforations and meshes so that the raw sheet materials are available when a basket or strainer is ordered. Consult a Titan sales representative to determine the opening size and material necessary for each application. More information is included in Titan’s Screen and Basket Selection Guide in the Technical Section of the catalog and online at www.titanfci.com.

Next Day Replacement Baskets and Screens Available
Titan can ship out many orders next day (or possibly same day!). Because many replacement screens and baskets are pre-made, Titan can offer next day services for most of Titan’s wye, basket, and duplex strainer models with standard screens and baskets. Titan is often capable of shipping screens and baskets in 4 to 6 HOURS while most competitors quote replacement lead times of 4 to 6 weeks! Call a Titan sales representative to check availability and delivery for your next replacement screen or basket requirement!

Knowledgeable Sales and Engineering Staff
Customer service is a priority at Titan Flow Control.

Titan FCI employs a sales and engineering staff with many years of experience in the industry. If you have any questions about screens or baskets, Titan will help you find the answer. Titan can help engineer screens and baskets for unique applications and designs. Your phone call will never be answered by an automated recording, but always by a real live person at Titan’s offices located in Lumberton, NC.
